## Guiding Principles

This is a general guideline that provides a pathway for the resumption of activity on the Colburn School campus during the COVID-19 pandemic. Our strategy is guided by the following principles

### **Health and Safety**

The Colburn School's utmost priority lies in the health and safety of its students, families, faculty, staff, and visitors. Our policies and protocols will be aligned and consistent with local orders and ordinances of the County of Los Angeles, as well as the State of California's Reopening Protocols and recommendations from the federal government, Centers for Disease Control and Prevention (CDC), and California Department of Public Health (LACDPH).

### **Continuing the Path Towards Excellence**

Our faculty and staff are dedicated in their mission to maintaining the quality of the Colburn experience. While these times are unprecedented and a challenge for all, we see it as an opportunity to focus ever more on excellence and the development of artistry, curiosity, and humanity for our students.

Information and knowledge regarding the COVID-19 pandemic continues to rapidly evolve, and the Colburn School is working to create a robust plan that includes a thorough exploration of potential contingencies. The Colburn School's policies and protocols will be updated as details become available, and the School will provide timely updates on the incidence of COVID-19 in the community while safeguarding details to protect private health information.

# Health & Safety Guidance

## Protections and Precautions

All individuals visiting the Colburn School are expected to fully comply with the policies, protocols, and guidelines outlined in this document. These policies, protocols and guidelines are important in the School's efforts to minimize the risk, exposure and spread of COVID-19 and maintain a safe learning and working environment. Failure to do so may result in corrective action.

Except where a parent or guardian is participating in the class with the student, parents/guardians and other visitors should not accompany students to class. In order to participate in a class, the parent or guardian must provide proof that they are fully vaccinated.

As much as possible, parents/guardians should communicate with the School remotely, preferably via email or phone. If they have brought a student to campus, they may wait outside of the School, on the plaza or in their car in the parking garage.

Parents are reminded of the importance of providing the School with up-to-date emergency contact information, including multiple parent/guardian contact options in the event that the School needs to contact the family.

## Personal Safety Practices

### Symptom Monitoring

The CDC (<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>) reports that individuals with COVID-19 have reported a wide range of symptoms – ranging from mild symptoms to severe illness. Individuals who have any symptoms of illness (apart from those attributable to seasonal allergies or a diagnosed chronic medical condition) should contact their health care provider for assistance and self-isolate per their health care provider and/or public health guidelines.

At this time, symptoms of COVID-19 include one or more of the following:

- Fever or chills
- Repeated shaking with chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Students visiting the Colburn School are required to complete the [LiveSafe health screening application](#) before arriving at the School. If, after answering all questions, the application clears the student (i.e., receives the green check), he/she may access the campus for the day. If not cleared, he/she should not come to campus.

Students cleared to come to campus will be required to show their clearance to the Security guard stationed at either the entrance to the parking garage or the Olive Building 3rd floor lobby.

Students who have symptoms of illness, a positive test for COVID-19, and/or direct exposure with a confirmed case of COVID-19 are required to stay home, report their condition(s) to the Dean of their academic unit, and seek guidance from their healthcare provider. In accordance with the Los Angeles County Department of Public Health, students exhibiting any of the symptoms above should stay home until at least 10 days have passed after the symptoms first appeared and at least 1 day after they have recovered. "Recovery" means that their fever has resolved for 24 hours without the use of fever-reducing medications and their respiratory symptoms (e.g. cough, shortness of breath) have improved. Even if their COVID-19 test results are negative, students showing any symptoms must remain at home for the full time, to prevent spreading their illness to others.

Students who have been in close contact with someone who has tested positive for COVID-19 should get tested and self-quarantine for 10 days even if the results of a test are negative for COVID-19. Tests can be obtained from a health care provider, from a Community COVID-19 testing center ([covid19.lacounty.gov/testing](https://covid19.lacounty.gov/testing)) or from most major pharmacies.

Vaccinated persons who are a close contact to a confirmed case are not required to quarantine and test for COVID-19 if they meet all of the following criteria: (1) are fully vaccinated (i.e.,  $\geq 2$  weeks following receipt of the second dose in a 2-dose COVID-19 vaccine series or  $\geq 2$  weeks following receipt of one dose of a single-dose COVID-19 vaccine) and (2) have remained asymptomatic since last contact with the infected person.

### **Temperature Screening**

Upon entering the Colburn School campus, a member of the Colburn Security team will conduct a temperature check. The CDC considers a person to have a fever when he or she has a measured temperature of 100.4° F (38° C) or greater, and anyone with a temperature in that range will not be allowed to enter the campus.

### **Students Becoming Ill While On Campus**

Any student who begins to feel ill while on the Colburn School campus must immediately notify the teacher or a Building Security officer. They will be immediately separated from other students and their parent or guardian will be notified to come pick them up.

### **Notification to Students, Staff, and Parents About Cases and Exposures On Campus**

If a Colburn employee, student or visitor tests positive for COVID-19, notification will be provided via email to all individuals who were on the Colburn School campus up to two days before the individual became ill or, if asymptomatic, two days before the positive test result. The name of the individual who has tested positive for COVID-19 will not be shared.

Contact tracing will be conducted to determine if anyone on campus during that period was exposed to COVID-19. Any individual deemed to have been exposed to COVID-19 will be notified that they may have been exposed, and that they should self-quarantine for 10 days, and must continue to closely monitor their health and strictly adhere to COVID-19 prevention precautions for a full 14 days.

In the event a full or partial closure of the School is required, students and families will be informed via email and details will also be posted on the Colburn School website.

Vaccinated persons who are a close contact to a confirmed case are not required to quarantine and test for COVID-19 if they meet all of the following criteria: (1) are fully vaccinated (i.e.,  $\geq 2$  weeks following receipt of the second dose in a 2-dose COVID-19 vaccine series or  $\geq 2$  weeks following receipt of one dose of a single-dose COVID-19 vaccine) and (2) have remained asymptomatic since last contact with the infected person.

### **Face Coverings**

The Colburn School must follow the Los Angeles County Department of Public Health Guidelines for a variety of businesses, including k-12 Schools, which continue to require the wearing of masks indoors for employees, students aged two and above, and visitors. Students and parents/guardians are required to wear face masks or face coverings inside campus buildings or in close proximity to others while outside. Face coverings are required for all lessons, rehearsals, and performances involving more than one person. Any activity that requires students to remove their face masks (such as playing wind or brass instruments) may only be done as a group if the activity is held outdoors. However, individuals may practice their instrument alone indoors in a studio or practice room with the door closed. (Note: Individuals with chronic respiratory conditions, or other medical conditions that make use of a face covering hazardous are exempted from this requirement and may request to be allowed to wear a face shield with a cloth drape. Students should contact the Dean of their academic unit.

Colburn Security officers, faculty and staff will enforce the face mask mandate and anyone not in compliance may be subject to disciplinary action and asked to leave the campus if they do not comply.

Appropriate use of face coverings is critical to minimizing the spread of large respiratory droplets and helping to prevent the spread of disease. The face covering is not a substitute for physical distancing. Students coming onto the Colburn campus are required to wear face masks unless they are alone in a practice room. Students are required to provide their own face masks. Parents must ensure that their children have clean face masks for any visit to campus.

### **Use and care of face coverings**

Putting on the face covering:

- Wash hands or use hand sanitizer prior to handling the face coverings.
- Ensure the face covering fits over the nose and under the chin.
- Situate the face covering properly with nose wire snug against the nose (when applicable)
- Tie straps behind the head and neck or loop around the ears.
- Throughout the process, avoid touching the front of the face covering.

Taking off the face covering:

- Do not touch your eyes, nose, or mouth when removing the face covering.
- When taking off the face covering, loop your finger into the strap and pull the strap away from the ear, or untie the straps.
- Wash hands immediately after removing.

Care, storage, and laundering:

- Keep face coverings stored in a paper (not plastic) bag when not in use.
- Cloth face coverings should be used for no more than one day; they should be washed between each use. Cloth face coverings should be properly laundered with regular clothing detergent before first use, and after each shift. They should be replaced immediately if soiled, damaged (e.g. ripped, punctured), or visibly contaminated.
- Disposable face coverings must not be used for more than one day and should be placed in the trash after your workday ends or if it is soiled, damaged (e.g., stretched ear loops, torn or punctured material), or visibly contaminated.

### **Physical Distancing**

Keeping space between you and others is one of the best risk control measures to slow the spread of disease. Avoid physical contact with others (including shaking hands). Since individuals can spread the virus before they know they are sick, it is important to always practice physical distancing even if you have no symptoms or illness. All individuals on campus are expected to follow the physical distancing practices below:

- Stay at least 6 feet/2 meters (about 2 arm's length) from other people at all times.
- Do not gather in groups or congregate in common spaces.
- Stay out of crowded places and avoid mass gatherings.
- Avoid in-person meetings. If you must meet, do so in a large office or conference room where you can keep 6 feet/2 meters distance between you, and limit the amount of time individuals

are together in an enclosed space. If possible, keep doors and windows open to increase airflow.

### **Handshakes**

Individuals should not shake hands or engage in other forms of greeting that break physical distancing requirements.

### **Hand Sanitizer**

Hand sanitizers containing at least 60% alcohol is available to all students and parents/guardians in all lobbies in both the Grand and Olive buildings. Swallowing alcohol-based hand sanitizers can cause alcohol poisoning. If any individual becomes aware that hand sanitizer may have been ingested, please immediately inform Colburn Security at (213) 621-4500 who should call Poison Control at 1-800-222-1222 as necessary.

### **Handwashing**

Soap and water is available to all students and parents/guardians in the restrooms located throughout the Grand and Olive buildings. Individuals should wash their hands before, throughout, and at the end of the workday. They should wash their hands frequently with soap and water for at least 20 seconds, especially after they have been in a public place, blowing their nose, coughing, sneezing, or touching their face. If soap and water are not readily available, a hand sanitizer containing at least 60% alcohol should be used. All surfaces of the hands should be covered and rubbed together until they feel dry. Any touching of the eyes, nose, and mouth should always be avoided, and individuals should wash their hands before touching their face.

### **Coughing/Sneezing Hygiene**

Individuals are required to wear face coverings at all times when in campus buildings. When outside, in a private office with a closed door, or other situations when individuals may not be wearing a face covering, they should always cover their mouth and nose with a tissue (or use the inside of their elbow) when they cough or sneeze. Used tissues should always be thrown in the trash. Hands should be washed for at least 20 seconds immediately after episodes of coughing/ sneezing. If soap and water are not readily available, a hand sanitizer containing at least 60% alcohol should be used.

### **Meals**

Before and after eating, individuals should wash their hands thoroughly to reduce the potential transmission of the virus. When eating on campus, individuals should wear their face coverings until they are ready to eat and replace them afterward. The Colburn Cafe has recently reopened. Customers are required to maintain at least 6 feet/2 meters of distance including lines and seating arrangements. Individuals should not sit facing one another and are encouraged to eat outside, weather permitting. Sharing of food is prohibited.

### **Parking and Bicycle Commuting**

Students and parents/guardians may park in designated parking lots and spaces provided they maintain 6 feet of physical distance from other individuals using the parking areas. Commuting via bicycle is encouraged and adequate capacity for bicycle storage exists in the parking lots.

### **Public Transportation**

Individuals who take public transportation should wear face coverings before entering the bus or train and avoid touching surfaces with their hands. Upon disembarking, they should wash their hands or use hand sanitizer with at least 60% alcohol as soon as possible, and before removing their face coverings and entering campus.

## **Facility Safety Measures**

### **Facilities**

We have reconfigured our facilities and spaces to reduce the risk associated with virus transmission. We have installed ultraviolet (UV-C) lighting to disinfect the air circulating within our buildings. UV lighting has been known to vastly improve Indoor Air Quality (IAQ) by reducing bacteria, viruses, and mold that either grow or pass through the air handling systems, reducing the risk of cold, flu, allergies, and other illness associated with air handling systems. The Colburn School's heating, ventilation, and air conditioning (HVAC) systems are designed to meet all required ventilation standards and building codes by allowing enough fresh outdoor air to control contaminant levels in buildings.

In line with public health guidance, our buildings may not be at full occupancy for the time being, and all occupants must adhere to physical distancing measures.

## **Custodial**

Custodial staff will clean and sanitize buildings on a regular basis to reduce the spread of viruses and risk of exposure to occupants and workers by following the CDC recommendations and guidance. Additionally, custodial employees are trained on cleaning procedures to disinfect facilities when necessary. Cleaning frequency will increase as campus spaces are re-occupied and the Custodial department returns to full strength:

- High-traffic areas and frequently touched surfaces: cleaning and sanitizing will be performed three times per day or once per shift (tabletops, doorknobs, light switches, countertops, handles/ rails, drinking fountains/bottle filling stations, vending machine buttons, shared printers and copy machines, elevator button/panels and stairwells).
- Base Building Restrooms: cleaning and sanitizing three times per day or once per shift (toilets, partitions, sinks, faucets, countertops, handles, light switches), and checking and replenishing dispensers.
- Soft and porous materials: carpets and upholstered furniture will be vacuumed once per week and sanitized with EPA-approved cleaner.
- Hard floors: floors will be swept and wet mopped once per week with an EPA-approved cleaner.
- Classrooms and large studio spaces (used for group instruction): cleaning and sanitizing once per day if the classroom or studio is being used or between Stable Groups if used by different Stable
- Groups in a single day.

## **Restrooms**

Use of restrooms will be limited based on size to ensure at least 6 feet of distance between individuals. Individuals should wash their hands thoroughly to reduce the potential transmission of the virus and wear their face coverings at all times.

## **Elevators**

Please follow the posted signs and/or floor decals indicating approved occupancy. Individuals should use the stairs whenever possible, but those using the elevators should wear their face coverings and avoid touching the elevator buttons with their exposed hand/fingers, if possible. Upon disembarking, Individuals should wash their hands or use hand sanitizer with at least 60% alcohol as soon as possible.

## **Vendors**

To the extent possible, visits by vendors are by appointment only. Vendors will be registered in a log that includes the vendor's name, phone number, address and email address, and will be required to sign a COVID-19 waiver form prior to starting their scheduled project(s). Vendors will also be required to complete and be cleared on the LiveSafe health screening application prior to coming on campus.

Vendors are checked in by Security upon arrival in the loading dock area. Walk-ins can be checked in at Olive Building Security Desk. Their movement while on the Colburn School campus is limited to the specific areas required to conduct their business with the School and to the restrooms.

Vendors are required to wear face masks or face coverings inside campus buildings or in close proximity to others while outside. (Note: Individuals with chronic respiratory conditions, or other medical conditions that make use of a face covering hazardous are exempted from this requirement.)

All vendors are bound by the restrictions of local, state and federal orders, and they must be able to maintain 6 feet/2 meters of separation to comply with physical distancing requirements.

Hand sanitizers, tissues, and trash cans are available for visitor use in the lobbies of the Grand and Olive buildings. Soap and water for handwashing is available in all restrooms.

## **Pianos/Keyboard Instruments**

Individuals are prohibited from using any type of wipes, disinfectants, liquids, gels, sprays, etc. on any part of a keyboard or instrument case. All of these products are harmful to the instrument and can damage both the keys and action components, as well as the furniture or case. Individuals should wash their hands thoroughly before and after using any keyboard instrument, and are required to wear a suitable face mask or face covering while playing a school keyboard instrument. The Piano Technician team will clean and sanitize pianos on a regular basis to reduce the spread of viruses and risk of exposure to occupants and workers by following the CDC recommendations and guidance. If additional cleaning or sanitizing is required, individuals should contact [pianotech@colburnschool.edu](mailto:pianotech@colburnschool.edu) or call 213-621-1037.

## **Fitness Center**

The Fitness Center is closed for use by any employee, student, parent/guardian, or visitor.

# Guidance for Specific School Scenarios: Entrance, Egress, and Movement Within the School

## **Enter/Exit control of buildings**

Entry to buildings will be regulated and monitored. Colburn School badges are required for entry to both the Grand and Olive buildings. Individuals should not hold or prop open exterior doors for any other person. Individuals waiting to enter the School must maintain 6 feet/2 meters from other people.

## **Movement Within the School**

Except where a vaccinated parent or guardian is participating in the class with the student, parents/guardians and other visitors should not accompany students on campus. They may wait for the student outside of the School, on the plaza or in their car in the parking garage. In order for a parent or guardian to participate in a class with the student, they must be fully vaccinated.

Students should proceed directly to their studio or classroom, following signage, and keeping 6 feet/2 meters of distance from others. These social distancing protocols must be maintained when entering and exiting a classroom or studio, and special attention must be paid to avoid grouping together with others when entering or exiting a space. When the class or studio session ends, students must proceed directly to the exit or parking garage and are prohibited from remaining on the Colburn School campus.

Care must be taken to avoid mixing with students or faculty that are entering or exiting from another classroom or studio. If students from another class or studio are in a hallway, faculty should ask their students to wait to exit until the hallway is clear.

### **Classroom Environments**

Students are expected to remain 6 feet/2 meters from others. In classrooms, where it is not possible for desks to remain 6 feet/2 meters apart, a minimum of 3 feet/1 meter is required. Students aged two and above are expected to wear face coverings at all times while on campus unless they are outside or in a private practice room with a closed door.

Studios and large classrooms will be assessed in order to implement measures to physically separate and increase distance between faculty and students such as:

- Visual cues such as floor decals, colored tape, or signs will be placed to indicate where individuals should stand while waiting in line.
- One-way directional signage will be placed in large open workspaces or areas with multiple throughways to increase distance between individuals moving through the space.
- Physical distancing and cleaning protocols will be set for areas where individuals may commonly gather or use shared resources.
- Interior stairways will be designated for up and down traffic as building space allows.

While custodial crews will continue to clean the facilities based on CDC guidelines, students will also be expected to wipe down commonly used studio and classroom surfaces.

### **Meetings and Congregating in Groups**

In-person meetings and congregating in groups in common areas are strongly discouraged, as convening in groups increases the risk of viral transmission. Communication between individuals is encouraged to take place via email, instant message, telephone, Zoom, or other available technology rather than face-to-face.

Attendees must always maintain 6 feet/2 meters of social distance and wear their face coverings during meetings.

# Protocols for students residing in the Colburn Residence Hall

## **If A Student Feels Sick**

Students must complete the daily health check on the LiveSafe app. If a student feels they have one of the symptoms of COVID, they must report it on the daily health questionnaire. The app will then instruct the student not to “go to work” (in other words, not go to class).

The student should consider whether they have been in any circumstances that could have given exposure to COVID (such as being in a large crowd outdoors or being around others indoors without a mask). If there is sufficient reason to think the symptoms are related to COVID, the student must take their temperature. If it is above normal (98.6 degrees F), the student should complete the following three steps:

- Take a rapid test
- Notify the RA on call
- Notify the proper administrator of your situation:
  - Conservatory: Registrar
  - Music Academy: Jenna Gundersen
  - Dance Academy: Gavin Kelley

If the rapid test is positive, the student must immediately notify the RA on call, who will then begin protocols for the Isolation plan.

If the rapid test is negative, the administrator of your academic unit will notify all faculty with whom you would otherwise interact that day and inform the faculty that you have an excused absence for illness.

## **A student with a negative test must:**

- Remain in their room for the day and only leave to pick up meals. Student should order meals ahead to minimize being out in the community/interacting with others. Student may not use a practice room or otherwise be outside of their room.
- The following morning, the student should take a second rapid test.
  - If it is also negative and the student is feeling well, the student does not need to remain in their room and may proceed with their scheduled activities.
  - If it is also negative but the student does not feel well, any additional absences will only be considered excused if standard procedures are followed for an absence due to illness (e.g. a visit to Urgent Care, the school nurse, etc.).

If a student has a normal temperature and is generally feeling unwell (not related to COVID), the student must get a doctor's note to excuse the absence. If a student does not provide a doctor's note, then the absence will remain an unexcused absence.

It is important to note that the Colburn School is not offering distance learning options. Students who are absent due to sickness (not related to COVID) or are missing school for non-quarantine reasons\* will not have live (Zoom) access to their courses and are responsible for communication with the appropriate faculty regarding any make-up work. Only those students who are required to isolate or quarantine due to COVID will be given the opportunity to access their course work and classes via live stream according to the regular schedule.

\*Students who are formally requesting an excused absence may discuss the option of attending class via Zoom with their individual faculty. Approval of this option is at the complete discretion of the faculty member and may depend on the class subject, the student's current academic standing, the length of absence, or other reasons that may make virtual instruction inappropriate for the circumstance.

### **Exposure to Affected Individuals**

While many mitigation factors are being undertaken to reduce the risk of exposure to COVID-19, the protocols listed below will be followed if a residential student is exposed to or contracts COVID-19.

The following definitions are useful to understand when determining time frames for exposure and infectious period:

- **Illness onset:** The **illness onset date** is the first date of COVID-19 symptoms or the date of a positive COVID-19 test result (rapide test or PCR), whichever is earlier.
- **Infectious period:** A case is considered to be infectious from 2 days before their symptoms first appeared until the time they are no longer required to be isolated (i.e., no fever for at least 24 hours, without the use of medicine that reduce fevers AND other symptoms have improved AND at least 10 days have passed since symptoms first appeared). A person with a positive COVID-19 test but no symptoms is considered infectious from 2 days before their test was taken until 10 days after their test.
- **Exposure:** A person is considered to have been exposed to a case during the infectious period if at least one of the following criteria are met:
  - Being within 6 feet of the infected person for a total of 15 minutes or more over a 24-hour period, with or without a mask.
  - Having had unprotected contact with the infected person's body fluids and/or secretions of a person with confirmed COVID-19 (e.g., being coughed or sneezed on, sharing utensils or saliva, or providing care without using appropriate protective equipment).

### Possible Exposure

Students who are identified to have had an exposure to a possible case of COVID-19 at school will be notified by the COVID-19 Task Force of the possible exposure via email. A possible case is defined as a student having a positive result on a rapid test; a confirmed case is defined as a student having a positive PCR test.

Asymptomatic students who are fully vaccinated AND who are a close contact of a possible COVID-19 case will be placed into modified quarantine under certain conditions.

- Students are required to adhere to modified quarantine until the results are returned on a PCR test for the possible case, as outlined below.
- **Modified Quarantine:**
  - Students must remain on campus in their residence, except for continuing to attend on-campus classes and academic activities if they are consistently and correctly masked and remain asymptomatic.
  - While on modified quarantine, students may not go to any indoor or outdoor public or community setting that is off-campus, such as restaurants, bars, markets and offices among others, nor attend any rehearsal, performance or gathering off campus.
  - They are not allowed to participate in on-or-off campus social activities.
  - They may not participate in any performance activities unless fully masked and socially distanced at least six feet; activities that involved a modified mask (e.g. for wind players) or that cannot be socially distanced are prohibited.
- If the possible case receives a negative PCR test result, students will immediately be released from the modified quarantine. See below for protocols if the possible case received a positive PCR result.
- If a student in modified quarantine receives a positive COVID-19 test result OR develops symptoms at any point within 14 days of their last exposure, they must immediately notify the RA on call, isolate (see Isolation plans, below) and follow Public Health's [Home Isolation Guidance](#).

### Confirmed Exposure

Students who are identified to have had an exposure to a confirmed case of COVID-19 at school will be notified by the COVID-19 Task Force via email. A confirmed case is defined as a positive PCR test.

Asymptomatic students who are fully vaccinated AND who are a close contact of a confirmed COVID-19 case will begin or remain in modified quarantine under certain conditions.

- **Modified Quarantine:**
  - Students must remain on campus in their residence, except for continuing to attend on-campus classes and academic activities if they are consistently and correctly masked and remain asymptomatic.

- While on modified quarantine, students may not go to any indoor or outdoor public or community setting that is off-campus, such as restaurants, bars, markets and offices among others, nor attend any rehearsal, performance or gathering off campus.
- They are not allowed to participate in on-or-off campus social activities.
- They may not participate in any performance activities unless fully masked and socially distanced at least six feet; activities that involved a modified mask (e.g. for wind players) or that cannot be socially distanced are prohibited.
- While on modified quarantine, the student may not leave campus for any reason, except to take a PCR test.
- Students are required to take a PCR test 3-5 days following the date of last exposure.
- Students must remain in modified quarantine for a full ten days, or until receiving a negative result on a PCR test, whichever is sooner.
- If the student receives a positive COVID-19 test result OR develops symptoms at any point within 14 days of their last exposure, they must immediately notify the RA on call, isolate (see Isolation plans, below) and follow Public Health's Home Isolation Guidance.
- NOTE: Asymptomatic students who have recovered from laboratory-confirmed COVID-19 within the last 90 days AND who are a close contact to a confirmed case are not required to quarantine or test for COVID-19. However, they should monitor for symptoms of COVID-19 for 14 days following an exposure.
- Colburn will assist with identifying housing for students to safely isolate or quarantine when Residential Hall facilities are not sufficient.
- DPH will contact exposed students who meet the quarantine requirement through the Case and Contact Investigation Program to collect additional information and issue the Health Officer Order for Quarantine.

### **Isolation plans for students with COVID-19:**

If a residential student contracts COVID-19 and symptoms are mild, they will be placed in isolation within the Residence Hall. The following protocols will be followed in that scenario.

- The student will be placed in isolation in a single room in a specially-designated medical suite in accordance with Public Health's [Home Isolation Guidance](#).
  - Students in isolation will be restricted to their room in the medical suite and may share bathrooms and common spaces with other students in isolation. These students cannot attend class, visit other areas of the campus (e.g., cafeteria, library, practice rooms, or laundry room), go to the grocery store or pharmacy, or attend any other events or gatherings.
  - If adequate space cannot be dedicated on campus, local hotels and motels may be used to provide sufficient short-term housing.
- Outside visitation is not permitted to students in isolation. If the student in isolation requires essential services, Residential Life staff will assist and will wear personal protective equipment,

limit their exposure to students, wash hands upon leaving the area, and monitor for signs and symptoms of illness.

- Students in isolation will be provided with any necessary supplies and services (e.g., food, cleaning supplies, laundry, thermometer, medications, information on who to contact if they become ill).
- If a student in isolation requires medical care, the healthcare provider, emergency medical services, and anyone else assisting with the transportation of student will be notified of the student's COVID-19 infection so they can take proper precautions.
- If a student in isolation must leave the living quarters, they must 1. Have approval to do so from the appropriate administrator of their unit; 2. wear a surgical mask or respirator, 3. physically distance themselves from others, and 4. go directly to/from their destination.
- Students in isolation will be given online educational access to missed classes when possible.
- Routine health checks for students in isolation will be done virtually when possible.
